**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Igarashi et al., hereinafter Igarashi (US Patent 5,990,546), previously cited.

Igarashi discloses in figure 5(B), a semiconductor device which comprises a substrate 2 and a semiconductor element 1 mounted thereon through a bump bonding part (the ball pads shown in the figure), wherein

the semiconductor element has been encapsulated by coating the back and the edges of the semiconductor element with a thermosetting, rubber containing sheet material 33 having tackiness (see col. 7, lines 20-24).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Igarashi.

Igarashi discloses the claimed invention, as discussed above, except for explicitly disclosing the tackiness of the sheet material is 2 to 15 in terms of ball tack. However, it would have been obvious to one of ordinary skill in the art at the time of the invention to adjust the tackiness of the sheet material to a certain amount in terms of ball tack in accordance with the process of forming the sheet material that a person with ordinary skill in the art selects to form the sheet material, and also to adjust the flexibility in adhesiveness of the sheet material that one of ordinary skill in the art might want the sheet material to have, for the purposes of handling the chip package during or after of the packaging process, further for the purpose of, for example, testing the chip in the package in various steps of the packaging process. See also *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980) for the proposition that it has been held that discovering an optimum value of a result effective variable involves routine skill in the art.

### ***Response to Arguments***

5. Applicants' arguments filed 10/25/05 have been fully considered but they are not persuasive.

Applicants argue that in figure 5B, the sealing sheet does not necessarily have tackiness. However, it is the position of the Office that the sheet material described above, inherently has at least some tackiness, especially since it contains rubber which has at least some tackiness.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
